

## CONTRAST SUMMER TRAINEESHIP

# "I GOT TO WORK ON CHALLENGING INTERNATIONAL CASES."

---

Judith  
law student

The first contact every Belgian law student has with contrast is probably as a result of their much needed **codex-friendly rulers**. My story is not different.

Last winter, I applied for a summer internship after some friends had done one in the summer of 2018 and were very enthusiastic about it. I can honestly say that after this month, I completely share their enthusiasm. I worked at the competition department and had the opportunity to work on some very **challenging international cases**.

Another interesting aspect of doing an internship at contrast is the academic work. contrast really invests in the **publication of books and articles**, which distinguishes them from a lot from other law firms. As a summer intern, you get to know the process that leads to a publication, which I found extremely interesting.

If you are interested in competition law and want an **inspiring and fun internship**, I can highly recommend you to apply for one at contrast.
